REMARKS

This application has been carefully reviewed in light of the Office Action dated May 15, 2007. Claims 67 to 72 are pending in the application, of which Claims 67 and 72 are independent. Claims 67, 68, 71, and 72 have been amended herein.

Reconsideration and further examination are respectfully requested.

Claims 62 to 72 have been rejected under 35 U.S.C. § 102(b) over U.S. Patent No. 5,550,576 (Klosterman). This rejection is respectfully traversed.

Claims 67 and 72 recite, *inter alia*, (i) the plural patterns of integrated program information data comprise different combinations of the program information data, according to plural sets of input sources specified by a user from among the plurality of input sources, and (ii) producing plural patterns of integrated EPG display data, each changeable by the user's operation, based on the plural patterns of integrated program information data.

Klosterman is not seen to disclose or suggest at least the above-discussed combination of features.

Klosterman is merely seen to describe that a lineup of channels 52 can be arranged such that the channels are in any arrangement programmed by the user. See col. 6, lines 34 to 48 of Klosterman.

In view of the foregoing, reconsideration and withdrawal of the § 102(b) rejection are respectfully requested.

No other matters being raised, it is believed that the entire application is fully in condition for allowance, and such action is courteously solicited.

Applicants' undersigned attorney may be reached in our Costa Mesa, California office at (714) 540-8700. All correspondence should continue to be directed to our below-listed address.

Respectfully submitted,

Damond E. Vadnais
